Subject: Lisbon Road FW: Quote 7399728-00 for 24" ADS

Mayor and Council,

I have forwarded a quote from Schimberg in Cedar Rapids. The quote is for 500 feet of 24 inch culvert with 5 intakes for Lisbon Road. I believe city staff could install the culvert. The culvert would also have 5 intakes that have a dome lid we would place in a small swale where the ditch used to be. This would allow us to fill in the ditch and help hold the shoulder on Lisbon Road. I have briefly discussed this with Dave Schechinger. His concern is the runoff from the road and if the 24" culvert would be enough. My argument for this would be currently each driveway has 18" culverts that handle all rain events except 4-8 inch rain events. So I can't imagine needing to up size to a 30 inch culvert. We cannot always plan for extreme conditions. Any feedback would be helpful.

Total cost from my estimates would be as follows.

27 tons of road rock at \$8.50 a ton = \$229.50

250 tons of 1" clean rock at \$11.95 a ton = \$2,987.50

110 cubic yards of dirt we should have this on hand.

Pipe, inlets, and outlet at bid price. = \$10,530.24

Also one driveway entrance will need to be replaced after we place the culvert through it. 20'x14'x4" = 3.5 yards @ \$105 a yard = \$367.50

Total is \$14,114.74

Work will be done by city staff so I have not included labor cost in this.

Thank you,

Nick Nissen
