Public Works Directors Report

For November, 2013

Building Maintenance:

- Brick paver area on west side of City Hall is complete. City crews did a very nice job on the brick work, and refinishing the wood benches.
- City owned building on 2nd Ave SW tested positive for black mold even after Duraclean removed the visible mold damage. I am compiling a cost estimate to repair the building, remove the mold damaged building materials, and renovate the building to the point where it meets all current applicable building codes.

Streets/Sidewalks:

- Crews are still working to replace sidewalk on city owned property that was marked for removal as part of the sidewalk replacement plan. Due to the declining temperatures some of the sidewalk replacement will go into next spring.

Trees/Planting:

- Last month crews finished planting the last of the trees paid for by the Trees Forever grant. Areas of town where trees were planted include Memorial Park, Nature Park, City Hall, Elliot Athletic Complex, and along Nature Trail north of 1st St. E.
- Brush week finished up last Thursday. This month will be the last brush pickup of the year.
- On October 29th Mike Wehde and I sat in on a webinar about chemical injections for Ash trees to combat Emerald Ash Borer (EAB). We both learned a lot about different types of chemical treatments and EAB. I will look further into the cost of injections, and contact IDNR to see how safe the chemical treatments are.

Michael Beimer, City Administrator
Mark Winder, Chief of Police
Dan Boggs, P.E., City Engineer

Scott C. Peterson, Mayor

Council:

Marty Christensen
Slaton Anthony
Jamie Hampton
Marianne Taylor
Francesca Thompson

-
- We will have a contractor in town this week removing dead trees from city parks and right of way.

Water:

- Crews have extended the water line inside the fence at the dog park. They will install the bases for the new drinking fountains this year if weather permits, but most likely next spring.
- Crews have been working on backup generator maintenance prior to winter.

Waste Water:

- Waste water plant is running efficiently. No problems to report.
- Wolfekuhle Contracting will start hauling bio-solids from the waste water plant this month.
