## TS50 LED Flashing Beacons

### General Description

Our TS50 LED Flashing Beacons are used to supplement warning signs at uncontrolled intersections or mid-block crosswalks. Our beacons feature flashing, high-intensity LEDs that alert motorists to the location of a pedestrian crossing. Studies have shown that flashing beacons significantly increase driver yielding behavior.

### Applications

- Pedestrian crossings
- School crossings
- School zones

### Benefits

- High intensity LEDs command the attention of drivers and significantly increase driver yield rates.
- LEDs visible under all weather conditions.

### Features

- Meets, exceeds ITE specifications; TXDOT approved.
- Standard 24/7 operation.
- All external hardware is stainless steel.
- Available in 12" or 8" red/amber/green balls.
- Available in 12" red/amber/green arrows.
- 12" bi-modal arrows available (amber/green).
- Available in 120VAC, 12VDC, 24VDC, 220VAC \*\*
- 4.5-watts power consumption.
- Solar power option available.
- Polycarbonate enclosure.

*"TAB" visors*

*Shown with amber LED*

\*\* Call for availability. Some sizes or styles may not be available in these voltages.
